Malamangnasa ikatlongkahon ito.MODat thirdbox this

Siguradona/\$ng nasa ikatlongkahon ito.MODCOMP at thirdbox this

Comment:

- *Sigurado* requires that the prejacent is a 100% objective certainty, it is infelicitous if it is merely a subjective certainty (therefore less felicitous in 1 and 2).
- This can also be "sigurado=ng" with the velar nasal allomorph of the linker/complementizer "na." The version with =ng sounds better to me.
- (4) Tim is calling for his dog. The dog is not coming. Tim looks for the dog in the kitchen, bedroom, living room, (in every room in the house) but the dog is not in any of those rooms. Therefore, Tim concludes that **the dog must not be in the house**.

(5) You know that Ann goes hiking from 7am until 8am every day. Most of the time Ann goes to the lake, but sometimes she goes to the mountains. It is now 7:30am and your friend asks where Ann is. You say to your friend: **Ann should be at the lake right now.**

(8) The teacher is not consistent. The students never know if he's going to come or not to teach class. Today, it's time to start class and the students are waiting again. **He might be coming to school today**.

Siguro papasok eskwelahan siya ngayong.araw. sa MOD come 3sg **DET** at.school today Papasok siguro siya eskwelahan ngayong.araw. sa MOD 3sg come **DET** at.school today

My sense is that "siguro" is biased toward the truth of the prejacent, rather than just conveying possibility. (maybe parallel to English "probably") For example, I don't think "Siguro p, siguro not p" is a coherent statement.

I would use "baka" in this situation, I think:

Bakapapasoksiyasaeskwelahanngayon.arawMODcome3sgDETat.schooltoday

(the alternative word order is impossible for "baka")

(9) Grace is looking for her necklace. She looks in her wardrobe and on top of the wardrobe. It's not there. She looks on top of the TV. It's not there. She looks in her backpack. It's not there. She hasn't checked her sister's wardrobe yet, but **Grace's necklace might be lost**.

(10) Charles is looking for his pet cat, but cannot find it. He knows that his cat is very elusive and mysterious. Charles tells his sister:

The cat may be inside. The cat may also be outside.¹

¹ (The task is not only to translate these two sentences individually, but to keep in mind the sequencing i.e., these sentences are not to be used in isolation).

```
Siguro nasa.loob ang pusa o pwede ring nasa.labas.
MOD inside DET cat or [possibly?] also outside.
```

Pwedeng nasa loob o nasa labas ang pusa.

H.H. also provides:

Pwedeng nasa loob ang pusa o pwede ring nasa labas.

Baka nasa loob ang pusa, o baka nasa labas.

Maaaring nasa loob ang pusa, at maaaari ring nasa labas.

Comment:

- *Pwede* requires the presence of alternatives (which could be contextually explicit but linguistically implicit). In the presence of such alternatives, pwede becomes more felicitous than siguro.
- *Siguro* can come after the verb. *Pwede*, *sigurado*, and *malamang* don't have the same syntactic flexibility.
- Here the reviewer that the continuation sounds like the speaker is self-correcting.
- "Maaari" is a possibility modal, though it doesn't seem to appear in your data.
- "at" is the conjunction "and"
- (11) Daniel lives in London and his friend has recently moved to New York. Daniel's parents told him that he is not allowed to go and see his friend in New York because it is too far away. You heard that Daniel is leaving London next week but you don't know where he will go. Daniel usually does things that he is not permitted to do. You think **Daniel might go to New York**.

Alternatively: Dapat ka=ng mag-suot ng helmet

Also, "dapat" may be more appropriately classified as conveying deontic weak necessity. "kailangan" feels stronger, so the following work:

"Kailangan(g) magsuot ka ng helmet"

(Here, the linker/complementizer might be optional. Note that the velar nasal linker =ng replaces the word final /n/ of the preceding word. Orthographically, the effect is just adding a "g" to the end of the word)
